## **REPORTINGMD RELEASES NEW VERSION OF SOFTWARE TO ASSIST PROVIDERS IN MANAGING PATIENT OUTCOMES AND INCREASING QUALITY PERFORMANCE.**

---

**Dartmouth/Lake Sunapee Region, NH:** ReportingMD, a national leader in quality reporting, has released version 8.0 of their Total Outcomes Management (TOM) application, greatly improving the user experience while maintaining standard industry reports.

TOM version 8.0 is an important incremental step towards our completely new TOM version 9.0 application, which will be released late fall. The TOM version 9.0 product will offer valuable reporting dashboards and comprehensive reporting solutions maximizing patient outcomes management for better value across the entire patient continuum. TOM supports Physician Quality Reporting System (PQRS), Group Practice Reporting Option (GPRO) PQRS, Value Based Payment Modifier (VBM), Meaningful Use (MU), and Accountable Care Organization (ACO) reporting.

ReportingMD will demonstrate the TOM version 9.0 application at the upcoming MGMA 2015 Annual Conference. Attendees are encouraged to contact ReportingMD prior to the Annual Conference to register for a demo.

***About ReportingMD***

ReportingMD, a CMS qualified registry and an ONC certified company, is a national leader in quality reporting. The company has successfully managed quality outcomes data for thousands of providers under various quality programs including ACO, PQRS, VBM, HEDIS (STARS), and MU. ReportingMD is devoted to helping their clients excel in an increasingly data-centric and value-focused environment. To learn more, visit [www.ReportingMD.com](http://www.ReportingMD.com).
