

Software QA Engineer

ReportingMD

JOB LOCATION: George's Mills, New Hampshire, United States

POSITION TYPE: Full-Time/Regular

SUMMARY:

Located near the beautiful Lake Sunapee region of NH, the applications development team is a small, motivated team of top-notch software developers and engineers working with the latest tools in an agile, start-up-like environment. We work on a variety of high-visibility technology projects that are central to the company's strategy, including cloud applications, big data, predictive analytics.

JOB DESCRIPTION:

deal candidates will enjoy working in a fast-paced environment that values collaboration and open teamwork and working on a variety of software projects.

- In an Agile environment, create and execute test cases and test plans across the application portfolio
- Isolate, document and track defects and take hands-on ownership of issues through their resolution
- Design and implement test tools and scripts covering regression, performance and usability
- Establish QA metrics and prepare daily/weekly test reports
- Work with development team to coordinate database and application deployments
- Comfortable working with Windows environments and has a strong understanding of the various parts of the technology stack to effectively isolate issues

SUMMARY OF DUTIES RESPONSIBILITIES:

Serve as a resource to ReportingMD regarding SQL design testing, specification review, SQL data logic, documentation and SQL testing for healthcare related datasets

- Effectively write SQL to create test data scripts
- Automation of test scripts as part of product life cycle
- Ability to effectively create SQL test scripting and reports based on functional requirements
- Design and layout functional testing of SQL coding for Telerik reporting
- Performs miscellaneous job-related duties as assigned

MINIMUM JOB REQUIREMENTS AND QUALIFICATIONS:

- Bachelor's degree in Computer Science or related technical discipline (or equivalent)
- Minimum 3 years' software QA experience, preferably with cloud-based systems
- Strong problem-solving and technical troubleshooting skills and attention to detail
- Strong experience developing test cases, test plans and automated testing frameworks
- Experience with Microsoft SQL Server, querying, and data validation.

PREFERRED QUALIFICATIONS / SKILLS:

- Excellent written and verbal communication and interpersonal skills
- Highly driven, positive attitude, self-motivated team player
- Thrives working in a fast-paced environment involving balancing multiple projects and priorities
- Well-developed intuition for areas of software with higher risk of failure
- Strong experience with infrastructure/platform/distributed systems
- Familiarity with Selenium, End test or other testing practices/tools helpful
- Familiarity with SQL and NoSQL databases
- Experienced with agile methodologies, source code version control and build tools such as GIT, Team Foundation Services, and Team City
- Experience in design testing
- Experience in testing reports – Telerik is a plus
- Working knowledge of data warehousing
- Experience with automated test scripts
- Ability to communicate effectively with management and technical staff
- Knowledge of HIPPA requirements, including EDI, privacy and security regulations

TYPICAL PHYSICAL DEMANDS:

Requires prolonged sitting, some bending, stooping and stretching. Requires eye – hand coordination and manual dexterity sufficient to operate a keyboard, photocopier, telephone, calculator and other office equipment. Requires normal range of hearing and eye sight to record, prepare and communicate appropriate reports. Lifting of equipment not to exceed 20 pounds.

WORKING CONDITIONS AND PHYSICAL EFFORT:

- Work is normally performed in the office work environment, although some virtual work is permissible
- Very limited physical effort required
